## Computer worksheet -2( 2020-21)

### Class –V

(Font size-20)

**Instruction:** Read the given notes carefully and learn it.

- Open word document in your laptop or computer.
- And write in a similar way as I have written with same font, font size, text color, high light, page color etc.
- Insert a table with 1 column and 4 row.
- Margin (Top-1, Bottom-1, Left-0.75 & Right-0.75).
- Font Size-11 where it is not mentioned.

(Font Size-13)

- ★ 'Computer' is derived from the word, 'compute' which means to calculate.
- ★ A computer is a versatile device that can handle different applications at the same time.

(FONT SIZE-12)

### History of computers (Font Size-15)

- Abacus was the first mechanical device for calculations, developed in China.
- It was made up of a wooden frame with rods, each having beads.
- The frame is divided into two parts- Heaven and Earth.
- Each rod in heaven has 2 beads and each rod in Earth has 5 beads.
- It was used for addition, subtraction, multiplication and division.

❖ Pascal adding machine

- [Blaise Pascal](#), a French mathematician invented an adding machine called Pascal's calculator, at the age of 19, in the year 1642.
- It used gears, wheels and dials.
- Numbers were displayed by rotating the wheels.
- It was capable of performing addition and subtraction.

❖ Leibniz Calculator

- [Leibniz](#), the famous German mathematician improved on Pascal's machine in 1671.
- It was a mechanical device.
- It was capable of performing addition, subtraction, multiplication, division and to find square roots.

❖ [Charles Babbage](#), a British mathematician is considered as the 'Father of computers'. He invented Difference engine in 1822 and Analytical engine in 1833.

- ❖ **Lady Augusta Ada Lovelace**, was an English mathematician and writer is considered as the 'First programmer', who suggested binary data storage (0 & 1) instead of decimal number system.

### Worksheet 3

- ★ **George boole** was an English mathematician. He linked complex mathematical problems with the binary number system and represent the positive results by 1 and the negative ones by 0. This theory of Boolean logic became the fundamental principle for the design of computer circuitry.

- ❖ **Tabulating machine**

- **Dr. Herman Hollerith**, an American statistician, invented a machine called tabulating machine.
  - It was capable of reading data, processing it and giving the desired output.
 

The input was given through punched cards.
  - The punched cards were used to record and store data or information.
  - In 1890, the United States census bureau used punched cards and sorting machines designed by Herman Hollerith.
- **Howard Aiken** was the primary engineer in IBM, who developed the first automatic sequence-controlled calculator, the **Mark I** in 1944. It was capable to execute long computations automatically.

- ❖ **John von neumann** started the practice of storing data and instructions in binary code, in memory. Neumann joined hands with Presper Eckert (American electrical engineer) and John Mauchly (American physicist) in a consulting role and EDVAC was built using binary code in 1950.
- **ENIAC** ( Electronic Numerical Integrator And Computer), the first general purpose electronic digital computer was invented by **John Mauchly** and **J. Presper Eckert** in 1946.

- ❖ **UNIVAC I** (Universal Automatic Computer I) was the world's first commercially available

**computer, designed by J. Presper Eckert and John Mauchly in 1951. It was the first computer to handle both numeric and text data. It was also the first computer to come equipped with magnetic tape unit and to use buffer memory.**

#### **Worksheet -1**

Q1.

1. Answers will vary.
2. The main character asked his friends to help pay for the bounce house as it is too expensive for him to buy on his/her own.
3. The characters switch from buying the bounce house to buying the trampoline because it costs more to maintain a bounce house. It takes electricity to blow it up every time and if there is a hole in the bounce house, they would need more money to mend it.
4. Develop means to start creating or come up with. The group created rules for using the trampoline for everyone to stay safe.
5. Answers will vary, but potential answers could be the main character is responsible, one who takes initiative or thoughtful to his friends.

14. Radhika sells 8 kg octopus for Rs 2408. At what price does she sell 1kg?

Ans. Cost of 8 kg of octopus = ₹ 2408  
Cost of 1 kg of octopus =  $2408 \div 8 = ₹ 301$   
The cost of 1kg octopus is ₹ 301

15. The population of a town is 61,370. The number of males is 32613 and that of females is 13192. Determine the population of children.

Ans. Total population of town = 61,370  
No. of males in town = 32,613  
No. of females in town = 13,192  
Total no. of males and females in town =  $32,613 + 13,192 = 45,805$   
No. Of children in town = Total population of town - Total no. of males and females in town  
 $= 61,370 - 45,805$   
 $= 15,565$   
Population of children in town is 15,565

<p><b>16.</b></p> <p>Ans.</p>	<p><b>Sharmila withdrew ₹ 90,000 from her bank account. She purchased a table for ₹ 22,000 , a computer for Rs. 34,500 and an almirah for ₹ 5,700. How much money was left with her?</b></p> <p>Sharmila withdrew amount from bank = ₹ 90,000</p> <p>Cost of table = ₹ 22,000</p> <p>cost of computer = ₹ 34,500</p> <p>Cost of almirah = ₹ 5,700</p> <p>Total money spend by her = ₹ 22000 + ₹ 34500 + ₹ 5700 = 62,200</p> <p>Money left with her = money withdrew from bank - money spend by her</p> $= 90,000 - 62,200$ $= ₹ 27,800$ <p>₹ 27,800 is left with Sharmila</p>
<p><b>17.</b></p> <p>a)</p> <p>Ans.</p> <p>b)</p> <p>Ans.</p>	<p><b>Mariya sells fish for ₹ 80 a kg</b></p> <p><b>How much does she earns for seven and half kg of fish?</b></p> <p>Cost of 1 kg of fish = ₹ 80</p> <p>Cost of 1/2 kg of fish = ₹ 80 × 1/2 = ₹ 40</p> <p>Cost of 7 kg of fish = ₹ 80 × 7 = ₹ 560</p> <p>Cost of 7 &amp; 1/2 kg of fish = 560 + 40 = ₹600</p> <p><b>Priyanka pay ₹ 200 for fish. How much fish does she get?</b></p> <p>Fish brought in ₹ 80 = 1 kg</p> <p>Fish brought in ₹ 200 = 200 ÷ 80 = 2 and half kg</p>
<p><b>18.</b></p> <p>a)</p> <p>Ans.</p> <p>b)</p>	<p><b>Prithu takes ₹ 30450 from a bank. He gives back ₹ 3540 per month for a year.</b></p> <p><b>How much amount will be pay back to the bank?</b></p> <p>Amount paid by Prithu in 1 month = ₹ 3540</p> <p>1 year = 12 months</p> <p>Amount paid by Prithu in a year = ₹ 3540 × 12 = ₹ 42,480</p> <p><b>What interest will he pay?</b></p>

Ans.	<p>Interest = Total amount paying back to bank - amount taken from bank</p> <p style="text-align: center;">= ₹ 42,480 - ₹ 30450</p> <p style="text-align: center;">= ₹ 12,030</p>

**Important formulas:**

- Speed = Distance ÷ time
- Distance = speed × time
- Time = Distance ÷ speed

For eg:

speed = 15 km/ hr.      Distance = 75 km      time = ?

We are going to use formula

$$\begin{aligned} \text{Time} &= \text{Distance} \div \text{speed} \\ &= 75 \div 15 \\ &= 5 \text{ hours} \end{aligned}$$

<b>19.</b>	<b>The speed of boat is 22 km per hour. How far will it go in five hours?</b>
Ans.	<p>Speed of motor boat = 22 km/hr</p> <p>Time taken by motor boat = 5 hour</p> <p>Distance travelled by motor boat = speed × time</p> <p style="text-align: center;">= 22 × 5</p> <p style="text-align: center;">= 110 km</p>

<b>20.</b>	<b>See the table and find the answer.</b>																		
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Boats</th> <th style="width: 33%;">Catch per trip(kg)</th> <th style="width: 33%;">Speed</th> </tr> </thead> <tbody> <tr> <td>Motor boat</td> <td>50kg</td> <td>25km/hr</td> </tr> <tr> <td>Log boat</td> <td>15kg</td> <td>3km/hr</td> </tr> <tr> <td>Machine boat</td> <td>700kg</td> <td>90km/hr</td> </tr> <tr> <td>Long tail boat</td> <td>25kg</td> <td>10km/hr</td> </tr> <tr> <td>Double decker boat</td> <td>500kg</td> <td>80km/hr</td> </tr> </tbody> </table>	Boats	Catch per trip(kg)	Speed	Motor boat	50kg	25km/hr	Log boat	15kg	3km/hr	Machine boat	700kg	90km/hr	Long tail boat	25kg	10km/hr	Double decker boat	500kg	80km/hr
Boats	Catch per trip(kg)	Speed																	
Motor boat	50kg	25km/hr																	
Log boat	15kg	3km/hr																	
Machine boat	700kg	90km/hr																	
Long tail boat	25kg	10km/hr																	
Double decker boat	500kg	80km/hr																	
a)	<b>How far the motor goes in 7 hours ?</b>																		
Ans.	<p>Speed of motor boat                      = 25 km/hr</p> <p>Time taken by motorboat                = 7 hours</p> <p>Distance cover by motor boat = speed × time = 25 × 7 = 175 km</p>																		

<b>b)</b>	<b>How long the machine boat will take to go 540 km ?</b>
Ans.	Distance travelled by machine boat = 540 km Speed of machine boat = 90 km/hr Time taken by machine boat = Distance ÷ speed = $540 \div 90 = 6$ hour
<b>c)</b>	<b>How much fish can the double decker boat bring in 5 trips ?</b>
Ans.	Fish bring by double decker boat in 1 trip = 500 kg Fish bring by double decker boat in 5 trips = $500 \times 5 = 2500$ kg
<b>d)</b>	<b>How much fish will each boat bring in 4 such trips ?</b>
Ans.	Fish bring by motor boat in 1 trip = 50 kg Fish bring by motor boat in 4 trips = $50 \times 4 = 200$ kg  Fish bring by log boat in 1 trip = 15 kg Fish bring by log boat in 4 trips = $15 \times 4 = 60$ kg  Fish bring by machine boat in 1 trip = 700 kg Fish bring by machine boat in 4 trips = $700 \times 4 = 2800$ kg  Fish bring by long tail boat in 1 trip = 25 kg Fish bring by long tail boat in 4 trips = $25 \times 4 = 100$ kg  Fish bring by double decker boat in 1 trip = 500 kg Fish bring by double decker boat in 4 trips = $500 \times 4 = 2000$ kg

**Mathematics worksheet-2 (2020-21)**

**Topic - Does it look like same ( introduction)**

<b>1.</b>	<b>Find out which letters in English alphabet look the same after half a turn.</b>
Ans.	H, I, X, N, S, Z and O.
<b>2.</b>	<b>Find out the one digit and two digits numbers which look the same after half a turn.</b>
Ans.	0, 1 and 8 are one digit numbers that look the same after half a turn.  11, 88 are two digit numbers that look the same on half a turn.

3.

Ans.

worksheet -3 ( 2020-21)

Topic - Types of symmetry

1. Which among the following pictures will look the same on half a turn?

Ans.

2. Which of the English words reads the same on half a turn?

ZOOM, MOW, SWIMS, SIS, NOON

Ans. MOW, SWIMS, SIS, and NOON read the same on half a turn.

3. Think and write of all 3 digit number which look the same on half turn.

Ans. 101, 111, 808, 888, 818, 181 are three digit numbers which look same after the half turn.

**WORKSHEET-4 (2020-21)**

**Topic- Symmetry**

1. Among the following shapes, find out which one would look the same after 1/4 turn, Put a (✓) mark. And put (×) mark on the shapes that will not look the same after 1/4 turn.

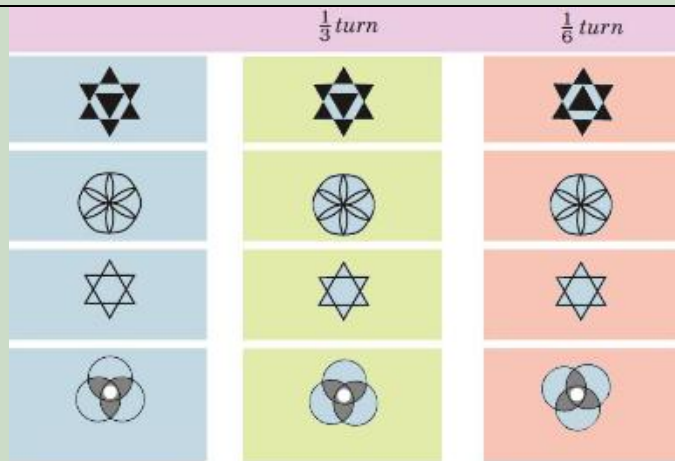

Ans.

<p>2.</p> <p>Ans.</p>	<p><b>Draw what the following shapes would look like on 1/4 and 1/2 turn.</b></p>
<p>3.</p> <p>Ans.</p>	<p><b>Which fan will look the same on 1/3 turn?</b></p> <p>Fan (a) will look same on 1/3 turn.</p>
<p>4.</p> <p>Ans.</p>	<p><b>Draw this shape after 1/3 turn.</b></p>
<p>5.</p>	<p><b>Look at the following shapes. Draw how they will look on 1/3 and 1/6 turn.</b></p>

## WORKSHEET-1

Ans1:- Fill in the blanks:

- (a.) Fruits, seeds.
- (b.) Sunlight
- (c.) Pollen
- (d.) Seeds

Ans2:- Match the following:

- (a.) Flower produce - Fruits
- (b.) Reproduction- Giving individual of its own kind
- (c.) Fruit contain- seeds
- (d.) Seeding- A baby plant

Ans3:-

Ans4:- Define:

- (a) Pollen:-When insect and animals move from one flower to another they transfer tiny particles called pollen.
- (b) Reproduction:-The process by which a living being produce a new individual of its own kind is called reproduction.
- (c) Germination:- The process by which a seed produces a seedling or a baby plant is called germination.

Ans5:- Right amount of water, air and warmth.

Ans6:- Role of flower:- Flower produce fruit, which contain seed.

Ans7:- spore

Ans8:- When a seed germinates, it grows out in the form of young sapling.

Ans9:- Difference between Reproduction and Germination

- (a) Reproduction: The process by which a living being produce a new individual of its own kind is called reproduction.
- (b) Germination: The process by which a seed produces a seedling or a baby plant is called germination.

Ans10:- Function of fruits: Fruits store food for the plant and bear seeds.

## WORKSHEET-2

Ans1:- Fill in the blanks:

- (a) Dispersal of seeds
- (b) Wind
- (c) Animals and explosion of fruits.

Ans2:-Tick the correct option:

- (a) Sunlight
- (b) Coconut
- (c) Wind

Ans3:-Match the following:

- (a) Hydrilla – Dispersed by water
- (b) Peas - Explosion of fruits
- (c) Mango - By animals(Humans)

Ans4:- Scattering of seeds away from the parent plant by wind, water, animals or other methods is known as seed dispersal.

Ans5:- Types of seed dispersals:-

- (a) Wind- Some seeds are very light and have hair or wings. They are easily carried away by wind and gentle breeze to distant places. E.g. Dandelion.
- (b) Water- Sometimes seeds are also carried and planted by flowing water. e.g. water lilly.
- (c) Animals- (i) By birds:- Birds eat fruit and some time the seeds come out in their dropping undigested and sometimes these buried fruits into new plants. E.g. Cocklebur-seed  
(ii) By human:- Humans eat various fruit and throw away their seeds. Then these seeds grow into a new plant. E.g. Cherries.
- (d) Explosion of fruits – Pods of some fruits like peas burst open when dry, thus scattering their seeds. E.g. Beans.

Ans6:- If seeds are not dispersed, they will not survive.

Ans7:- Necessary conditions are right amount of water, air and warmth.

## WORKSHEET – 3

Ans1:- (a) Spores  
(b) Money plant  
(c) All of these

Ans2:- (a) Potato - By stem  
(b) Mango - By seeds  
(c) Cherry - By seeds  
(d) Radish - By roots

Ans3:- Some plants like sweet potato, radish and carrot whose roots can grow directly into new plants under suitable conditions.

Ans4:- Examples- Rose and potato.

Ans5:- From leaves. The leaves of some plant like Bryophyllum grow plantlets on their edges. These plantlets have roots and they fall off and grow into new plants.

## WORKSHEET – 4

Ans1:- (a) All of these  
(b) All of these  
(c) Cultivation

Ans2:- (a) pesticides, insecticides  
(b) November to April  
(c) June to October

Ans3:- Name the following:-  
(a) Rabi crops- Wheat, grams, mustards, etc  
(b) Kharif crops- Cotton, rice, Maize, jute etc.

Ans4:- We need to grow crops because they are major source of food. They provide raw material for industries such as jute, cotton, etc.

Ans5:- Different stages of crop production are  
(i) Ploughing  
(ii) Sowing  
(iii) Adding fertilizers  
(iv) Irrigation  
(v) Protection  
(vi) Harvesting, storing and transportation.

Ans6:- To be protected from moisture.

Ans7:- Rabi crop:- The crops that grow in winter season are called rabi crops. E.g Wheat, gram, etc.

Kharif crop:- The crops that grow in summer season are called kharif crops. E.g. Rice, jute, etc.

Ans8:- Excess of fertilizer may harm the soil and the crop because it decreases the fertility of soil.
